The LONGER a fraud lasts before it is detected, the MORE the victim organization loses.

PROACTIVE MEASURES catch fraud sooner and minimize losses. Frauds that are caught by reactive measures last longer and cause more harm.

AN INCIDENT OF FRAUD COSTS A COMPANY A MEDIAN OF $145,000. NEARLY A QUARTER OF THESE FRAUDS COST THE BUSINESS AT LEAST $1 MILLION.

In organizations that employ Certified Fraud Examiners (CFEs), fraud losses are 53% LOWER on average.
